

Graphs

Bar graph

Circle graph

Double bar graph

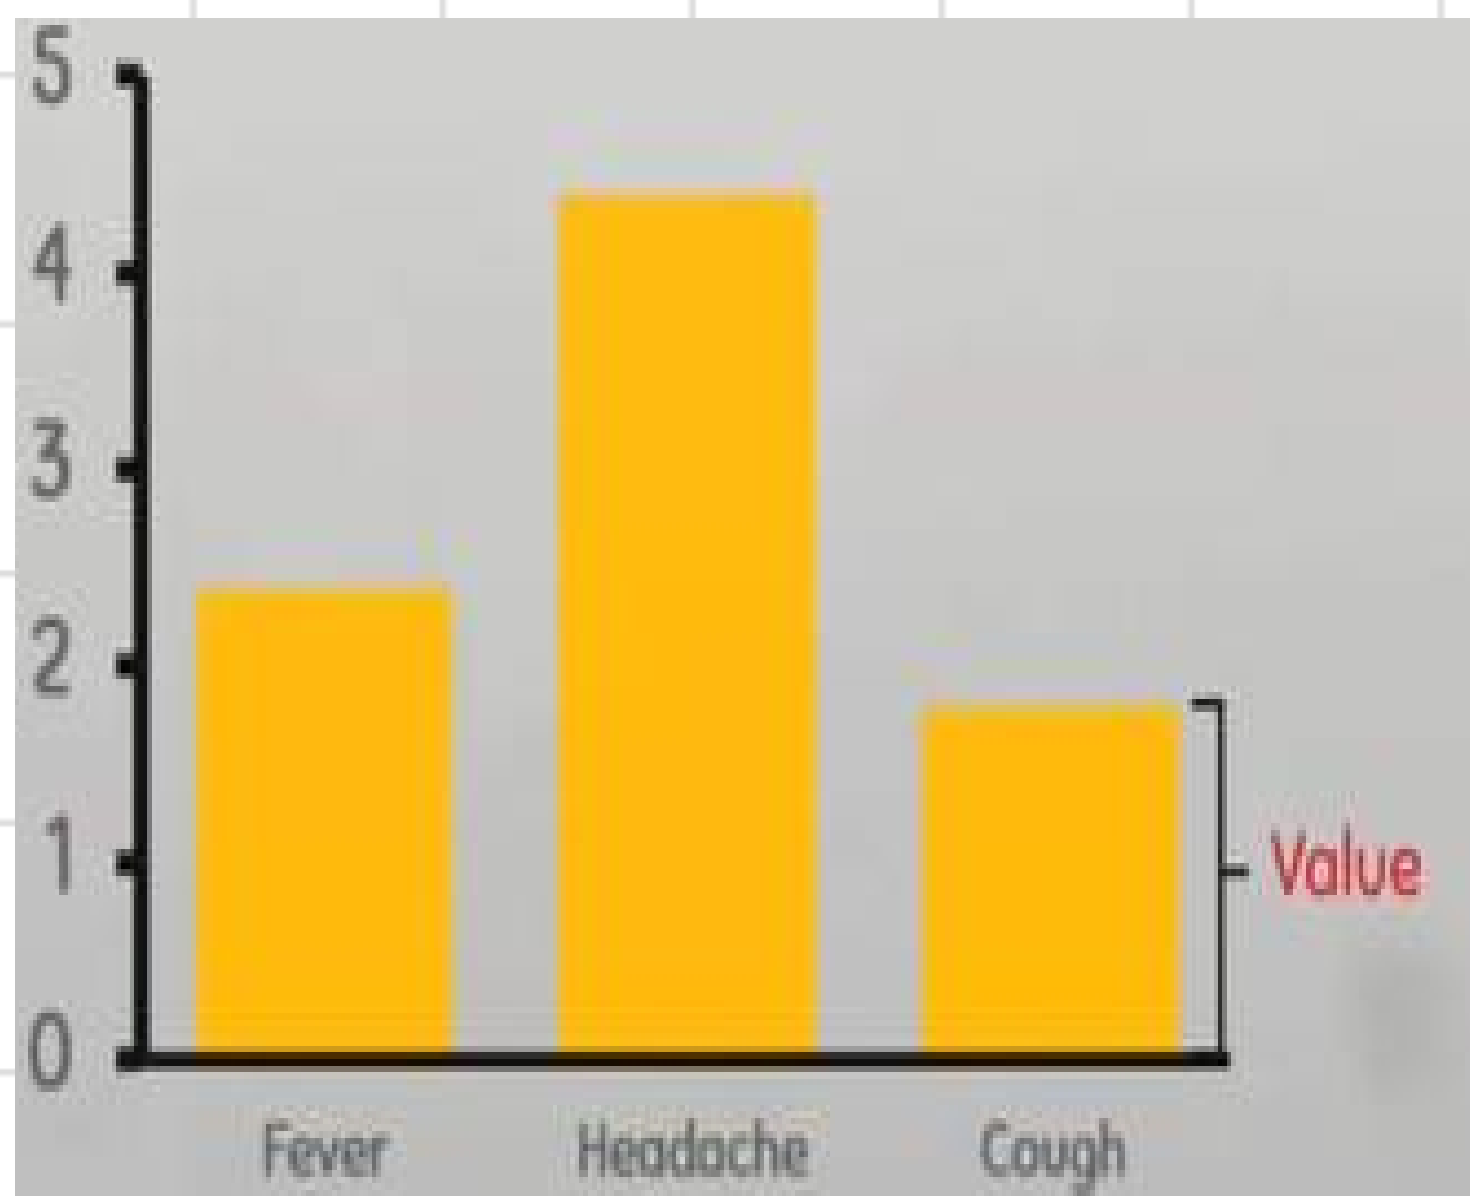

Box whiskers graph

Histogram

line graph

line plot

27 Bar graph

used to show the frequency of different categories, but also to visualize numerical data,

28 line graph

Line chart

Showing data over time

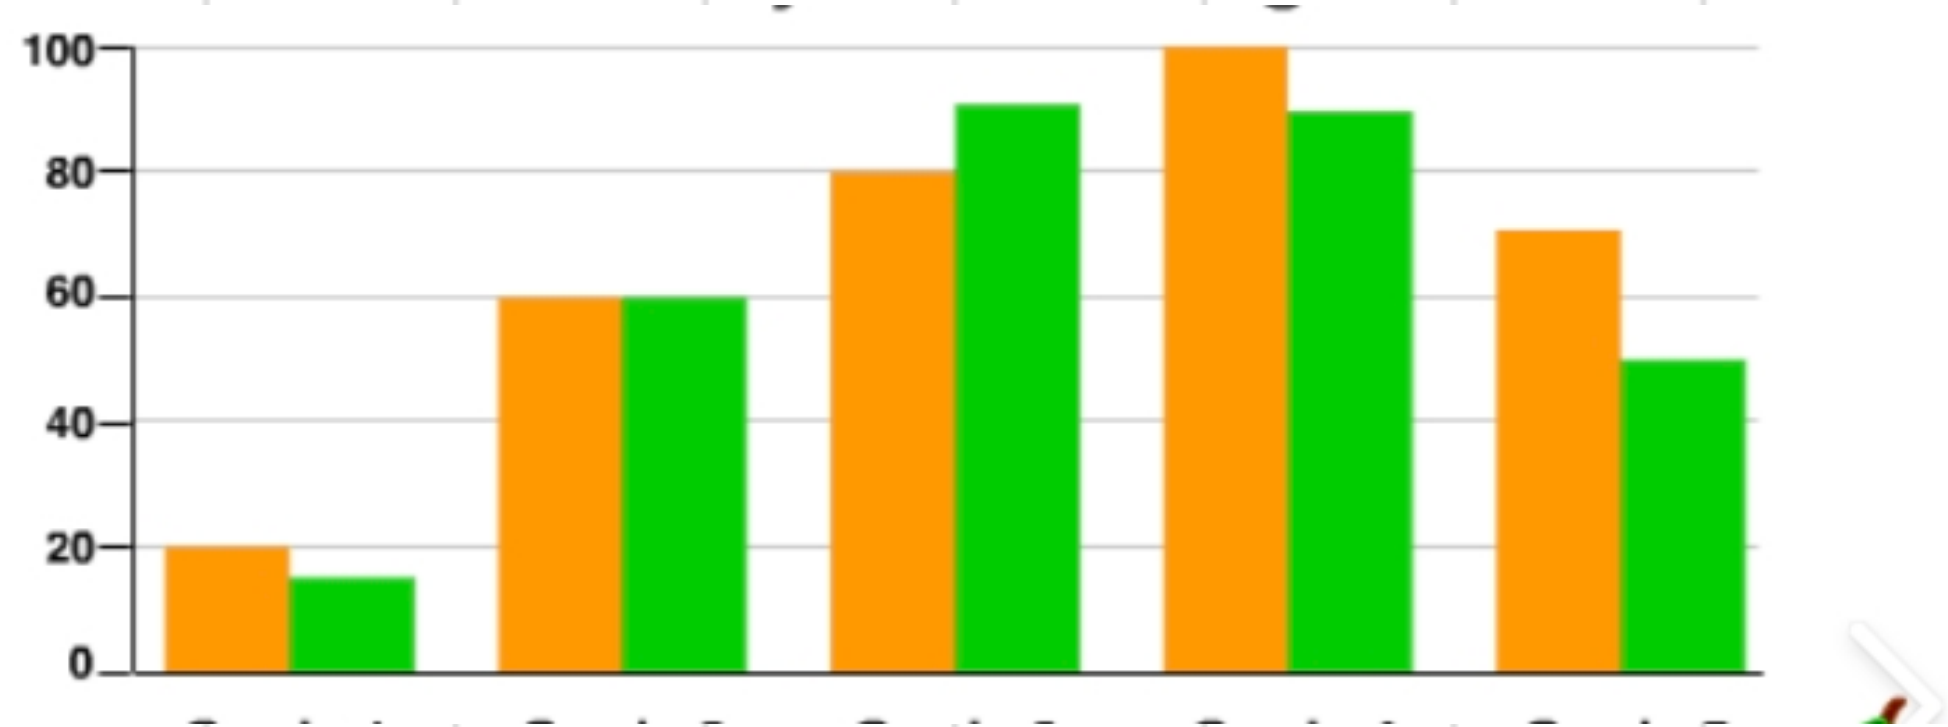

31 circle graph

Pie chart

Showing parts of a whole

41 double bar graph

51 Histogram

Histogram

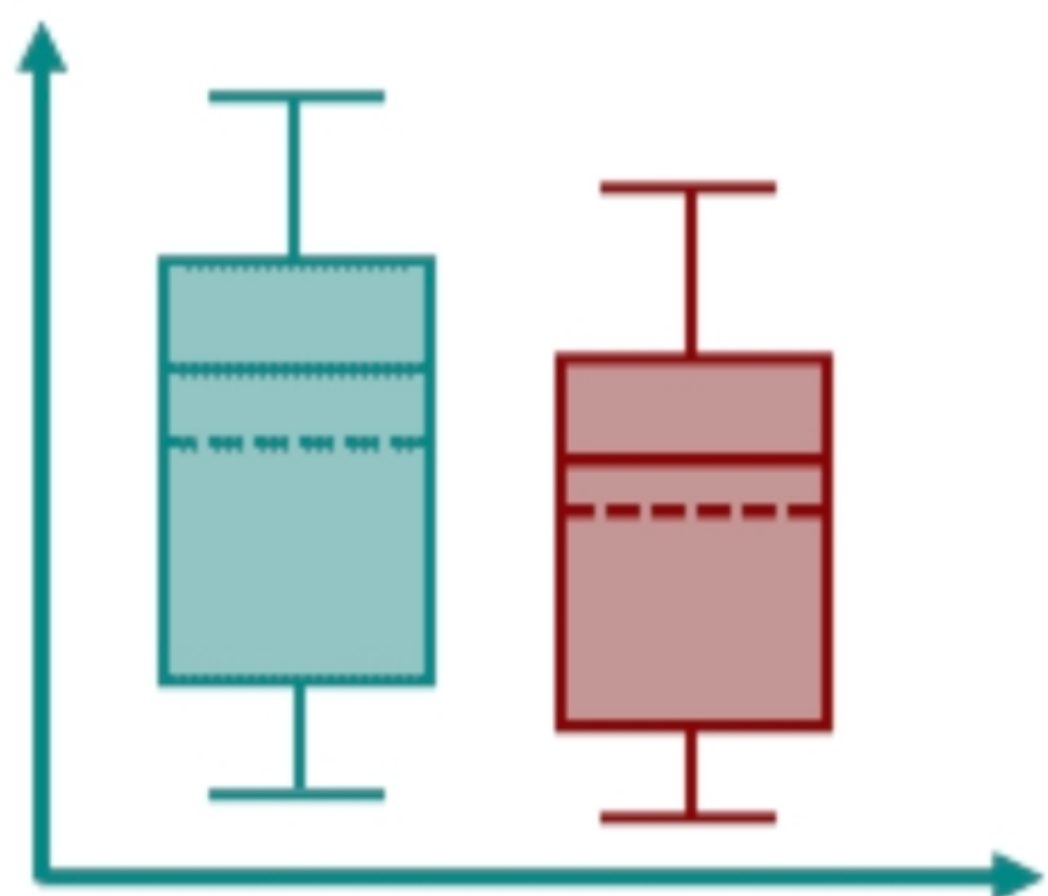

shows how often
different values
occurs in a set of
data

→ visual representation of how
many times something happens

61 Box and whisker

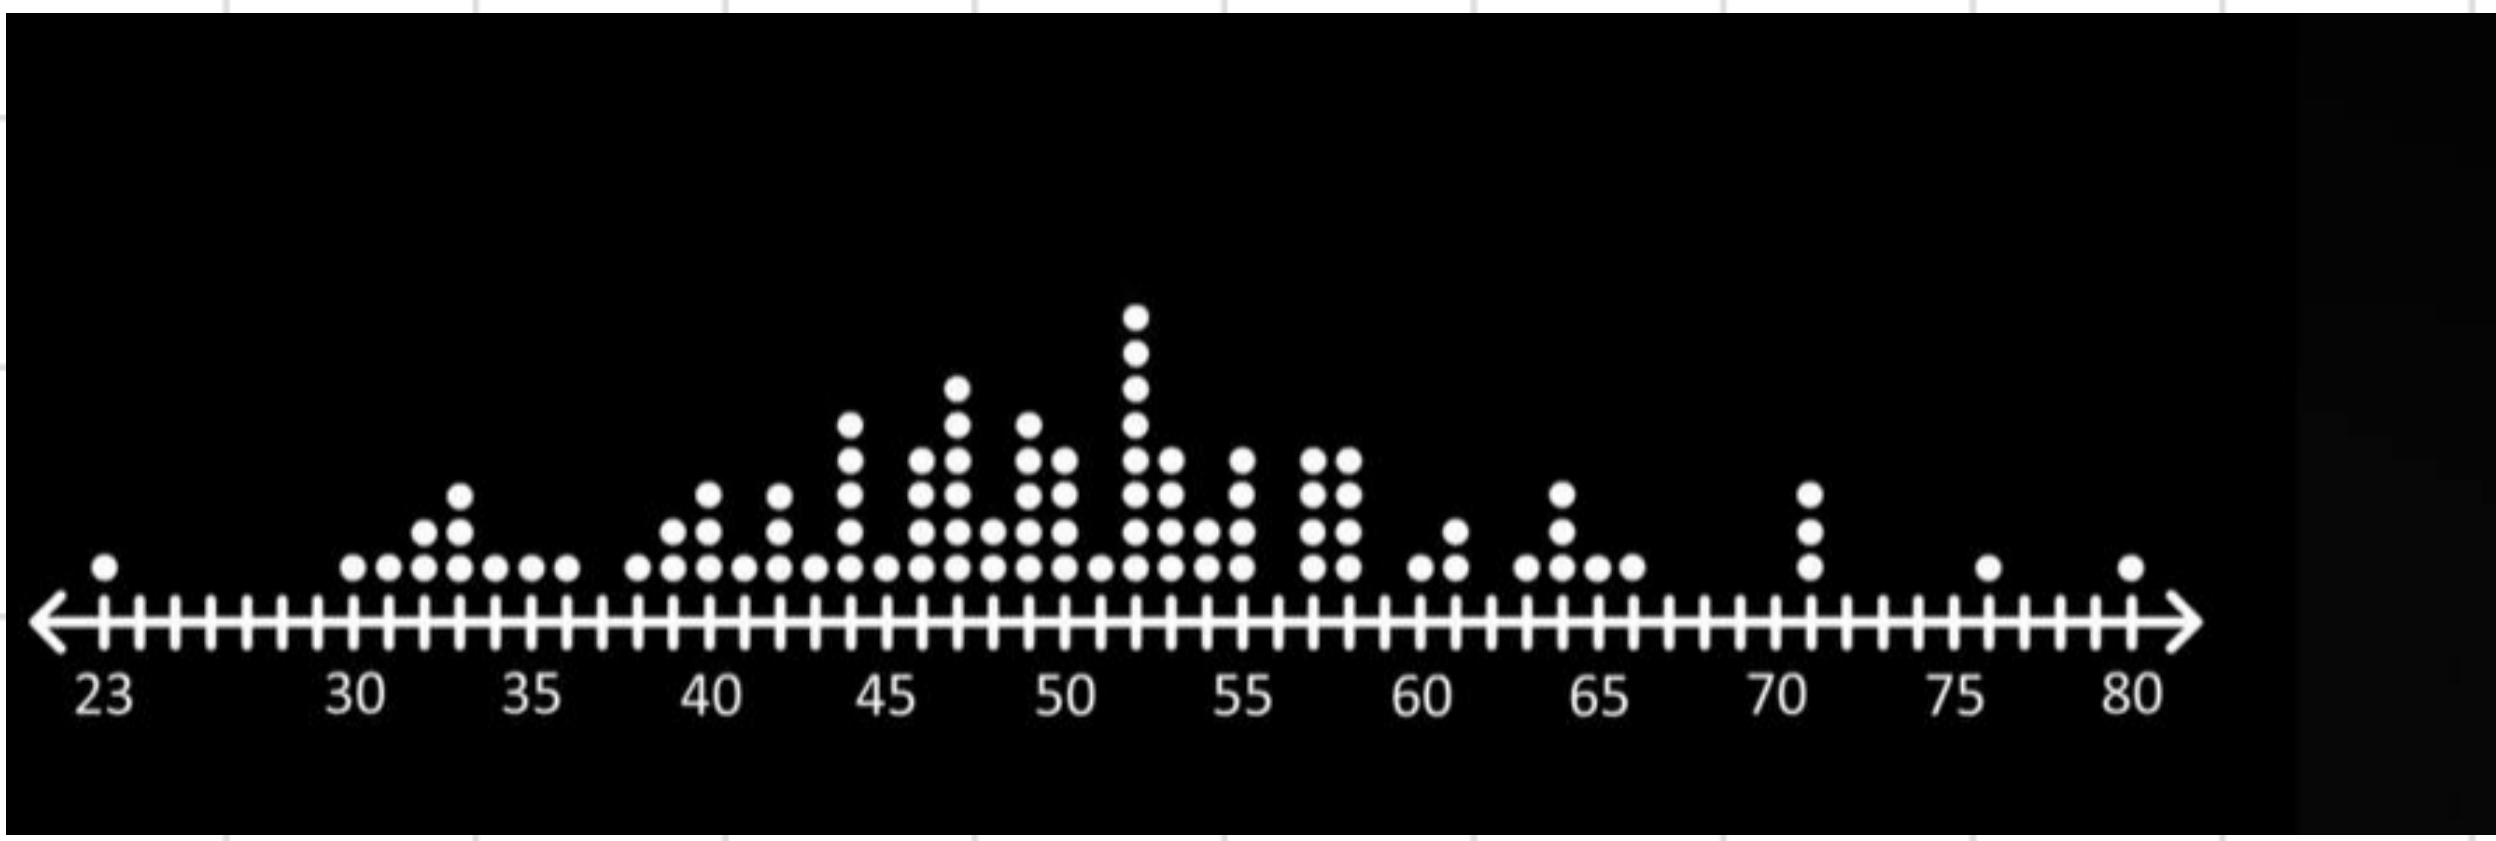

Boxplot

Show variation
among the data

→ line plot

/ Dot plot

Show very various
categories on
a number line

Stem and leaf plot

→ Organizing Data by using the place values of the numbers

1) put them from least to greatest

10, 11, 14, 31, 33

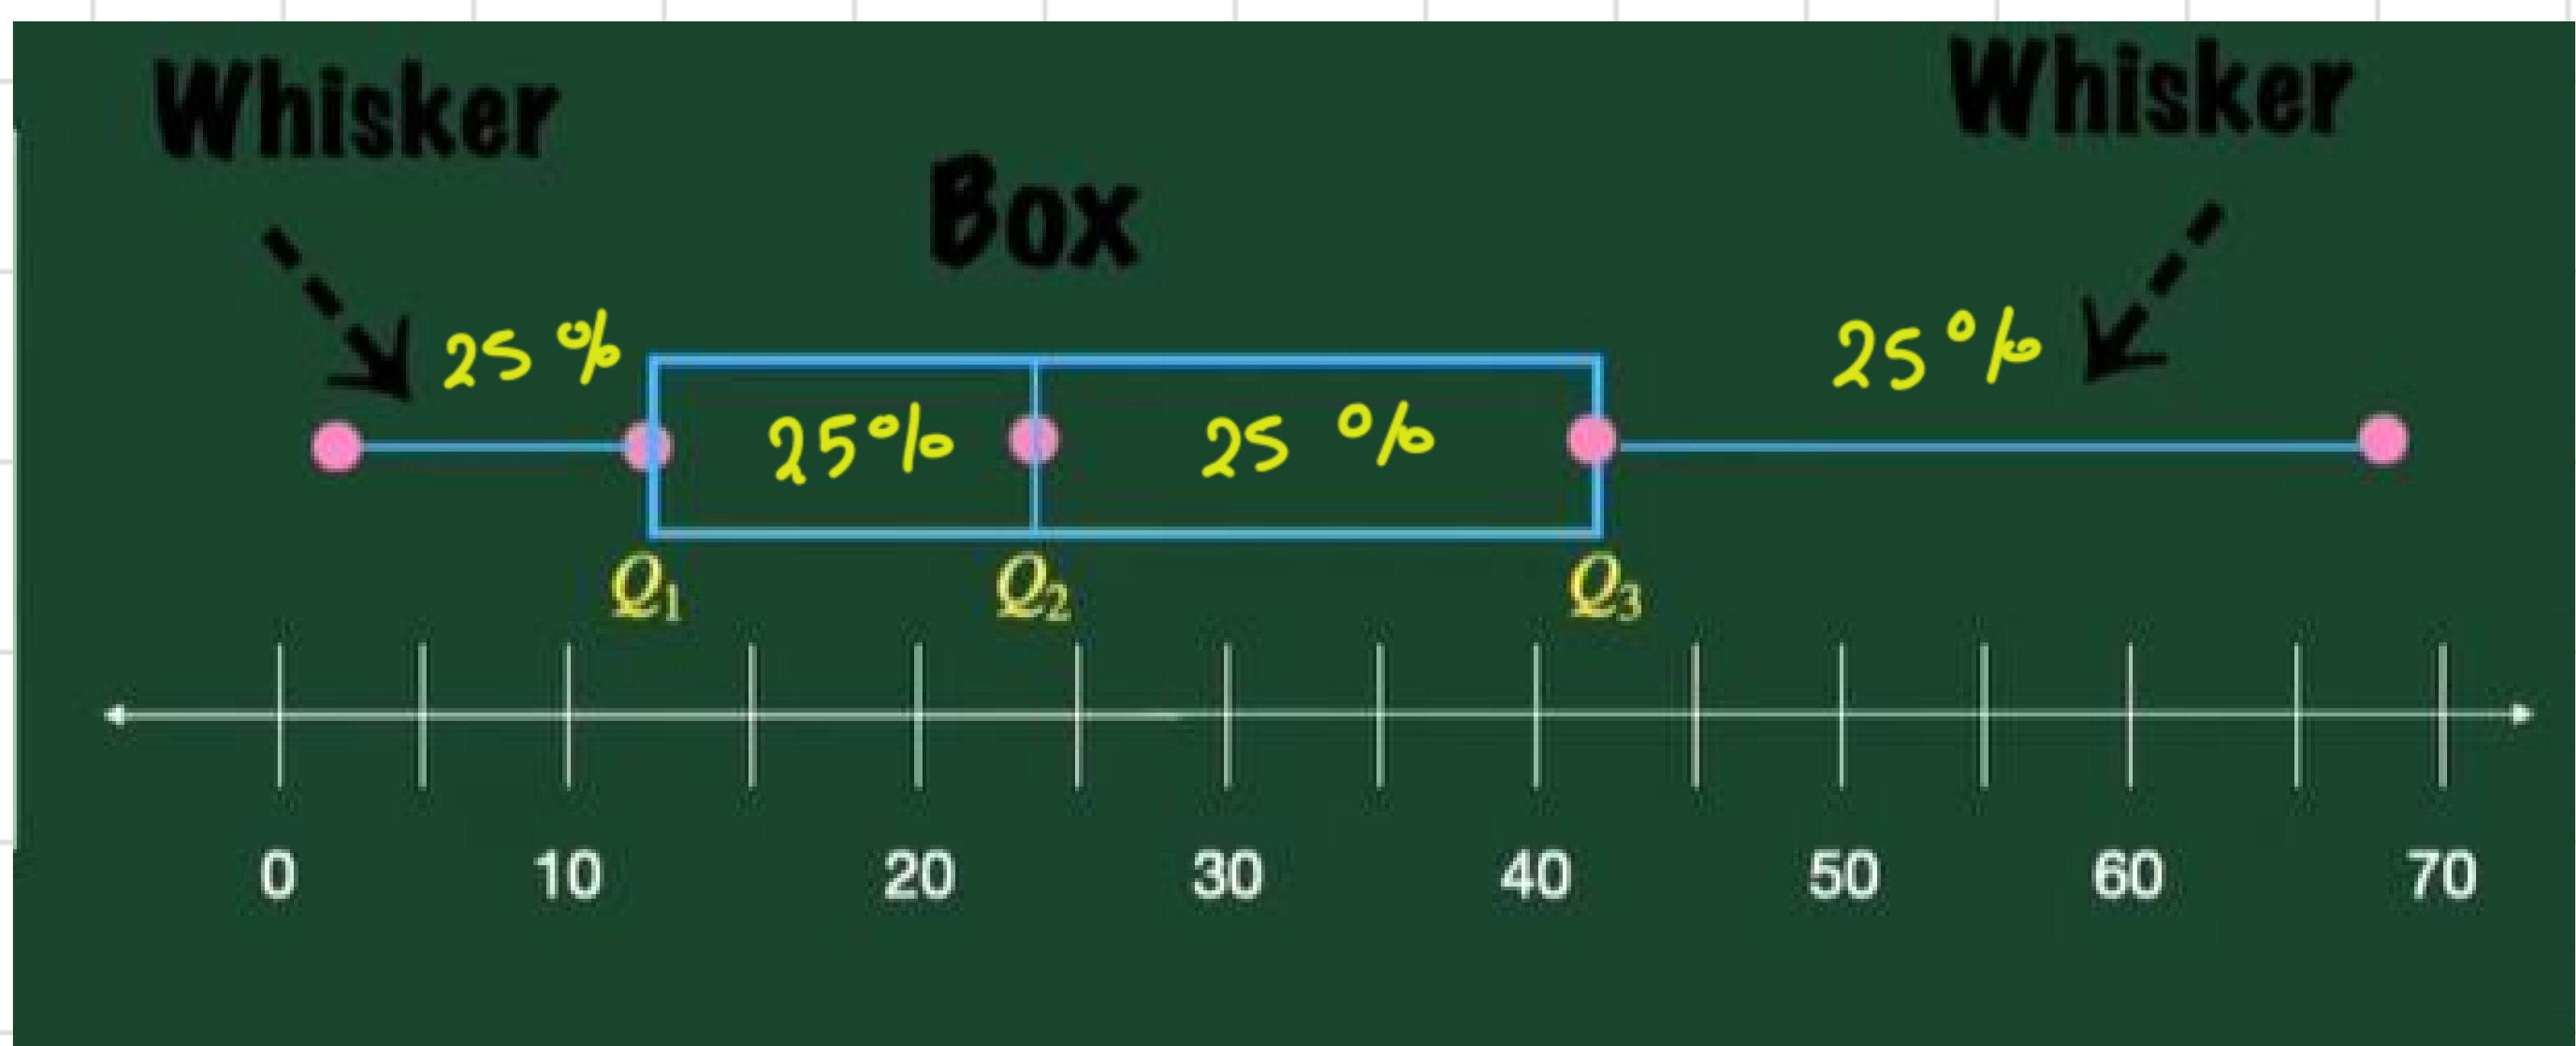

2) Draw T-chart

Stem	leaf
1	0 1 4 →
2	
3	1 3

Box and whisker plot

Five number summary

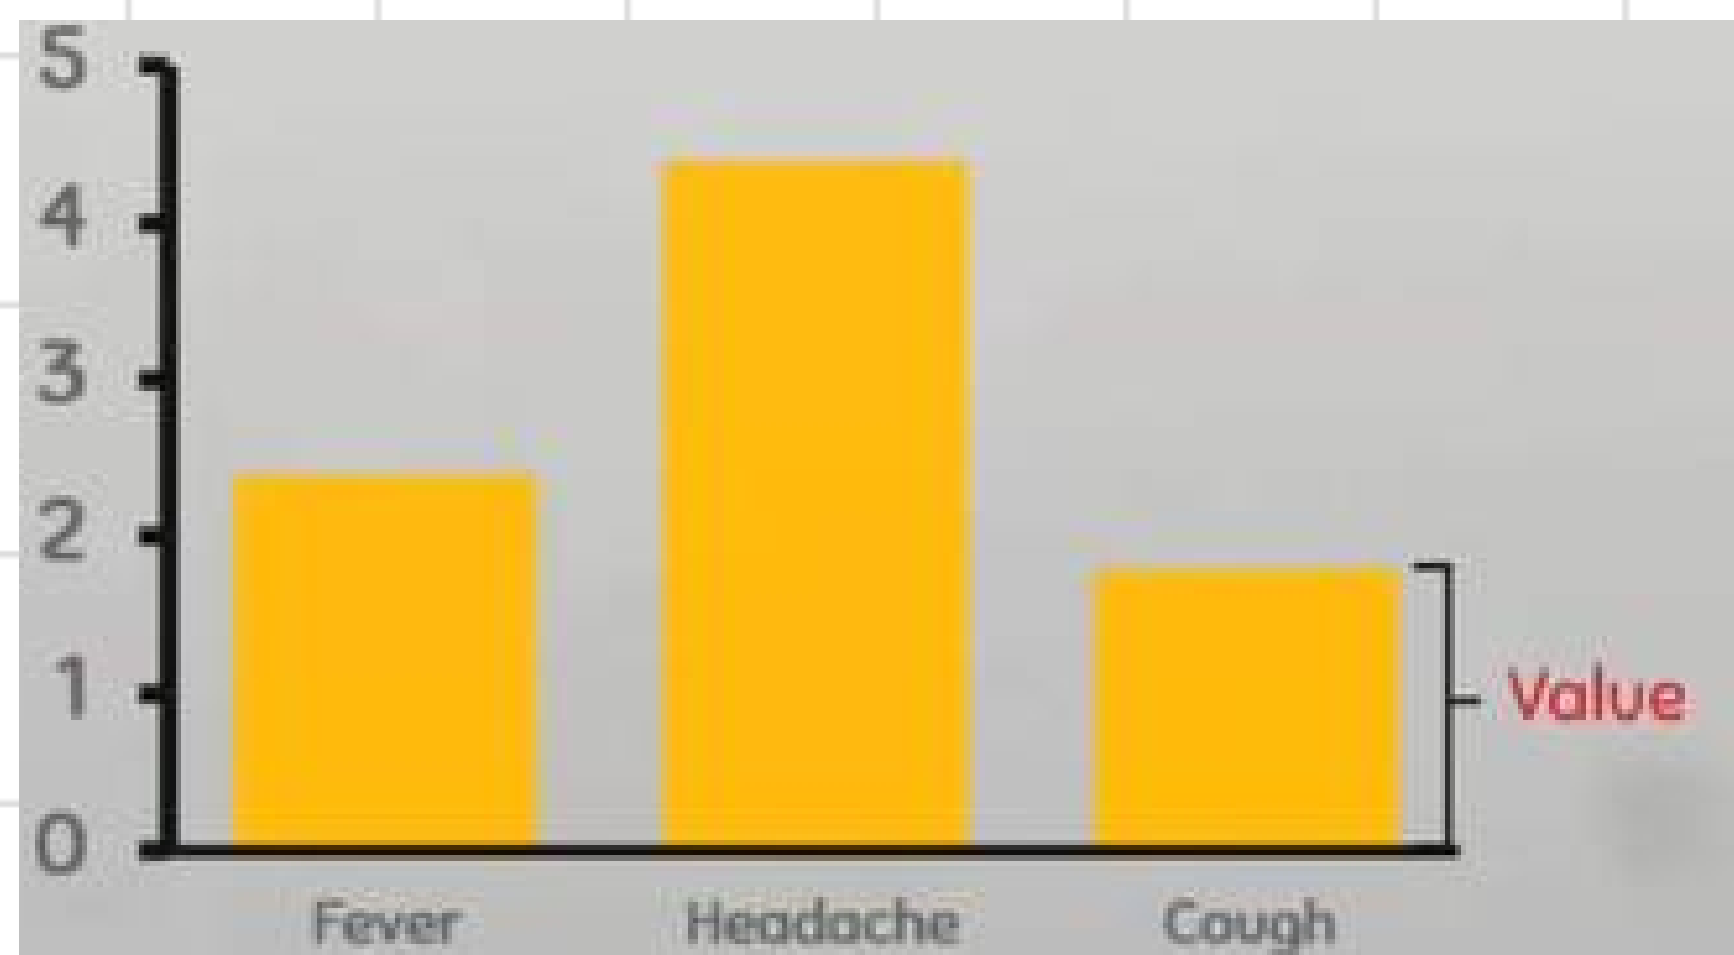

Minimum value	
Maximum value	
Median (Q_2)	
Q_1	
Q_3	

Bar charts

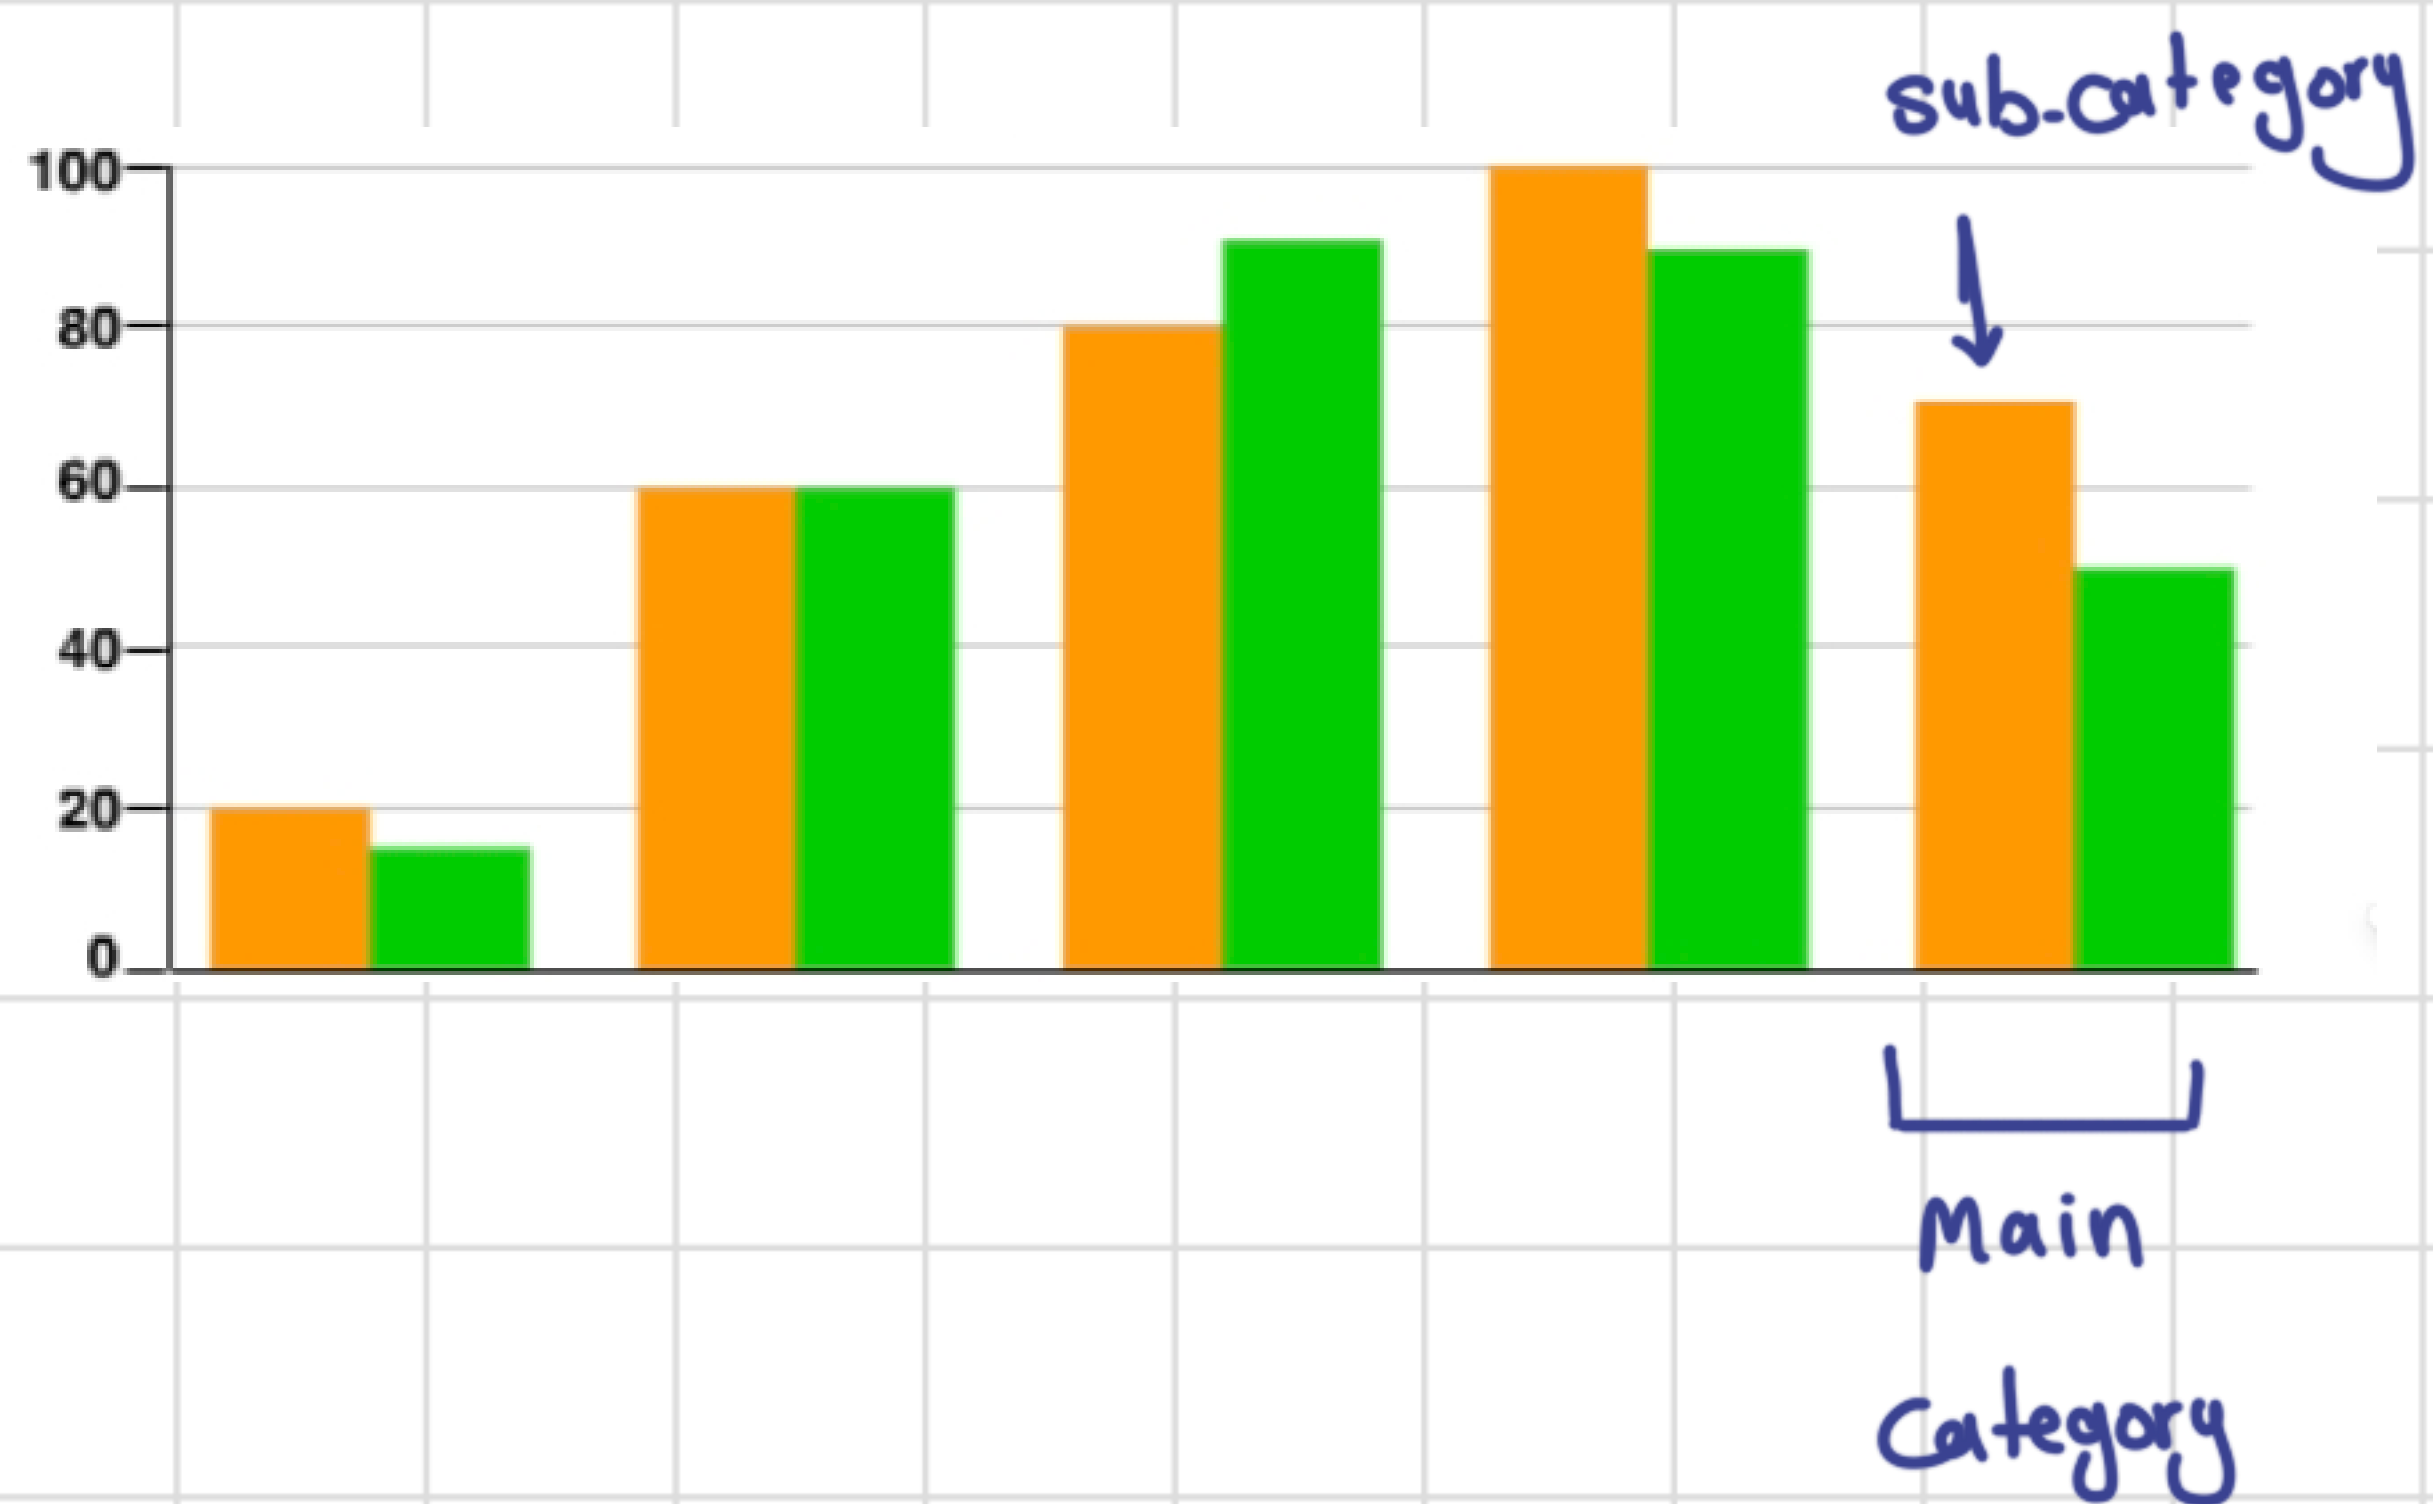

→ Simple

one categorical
variable

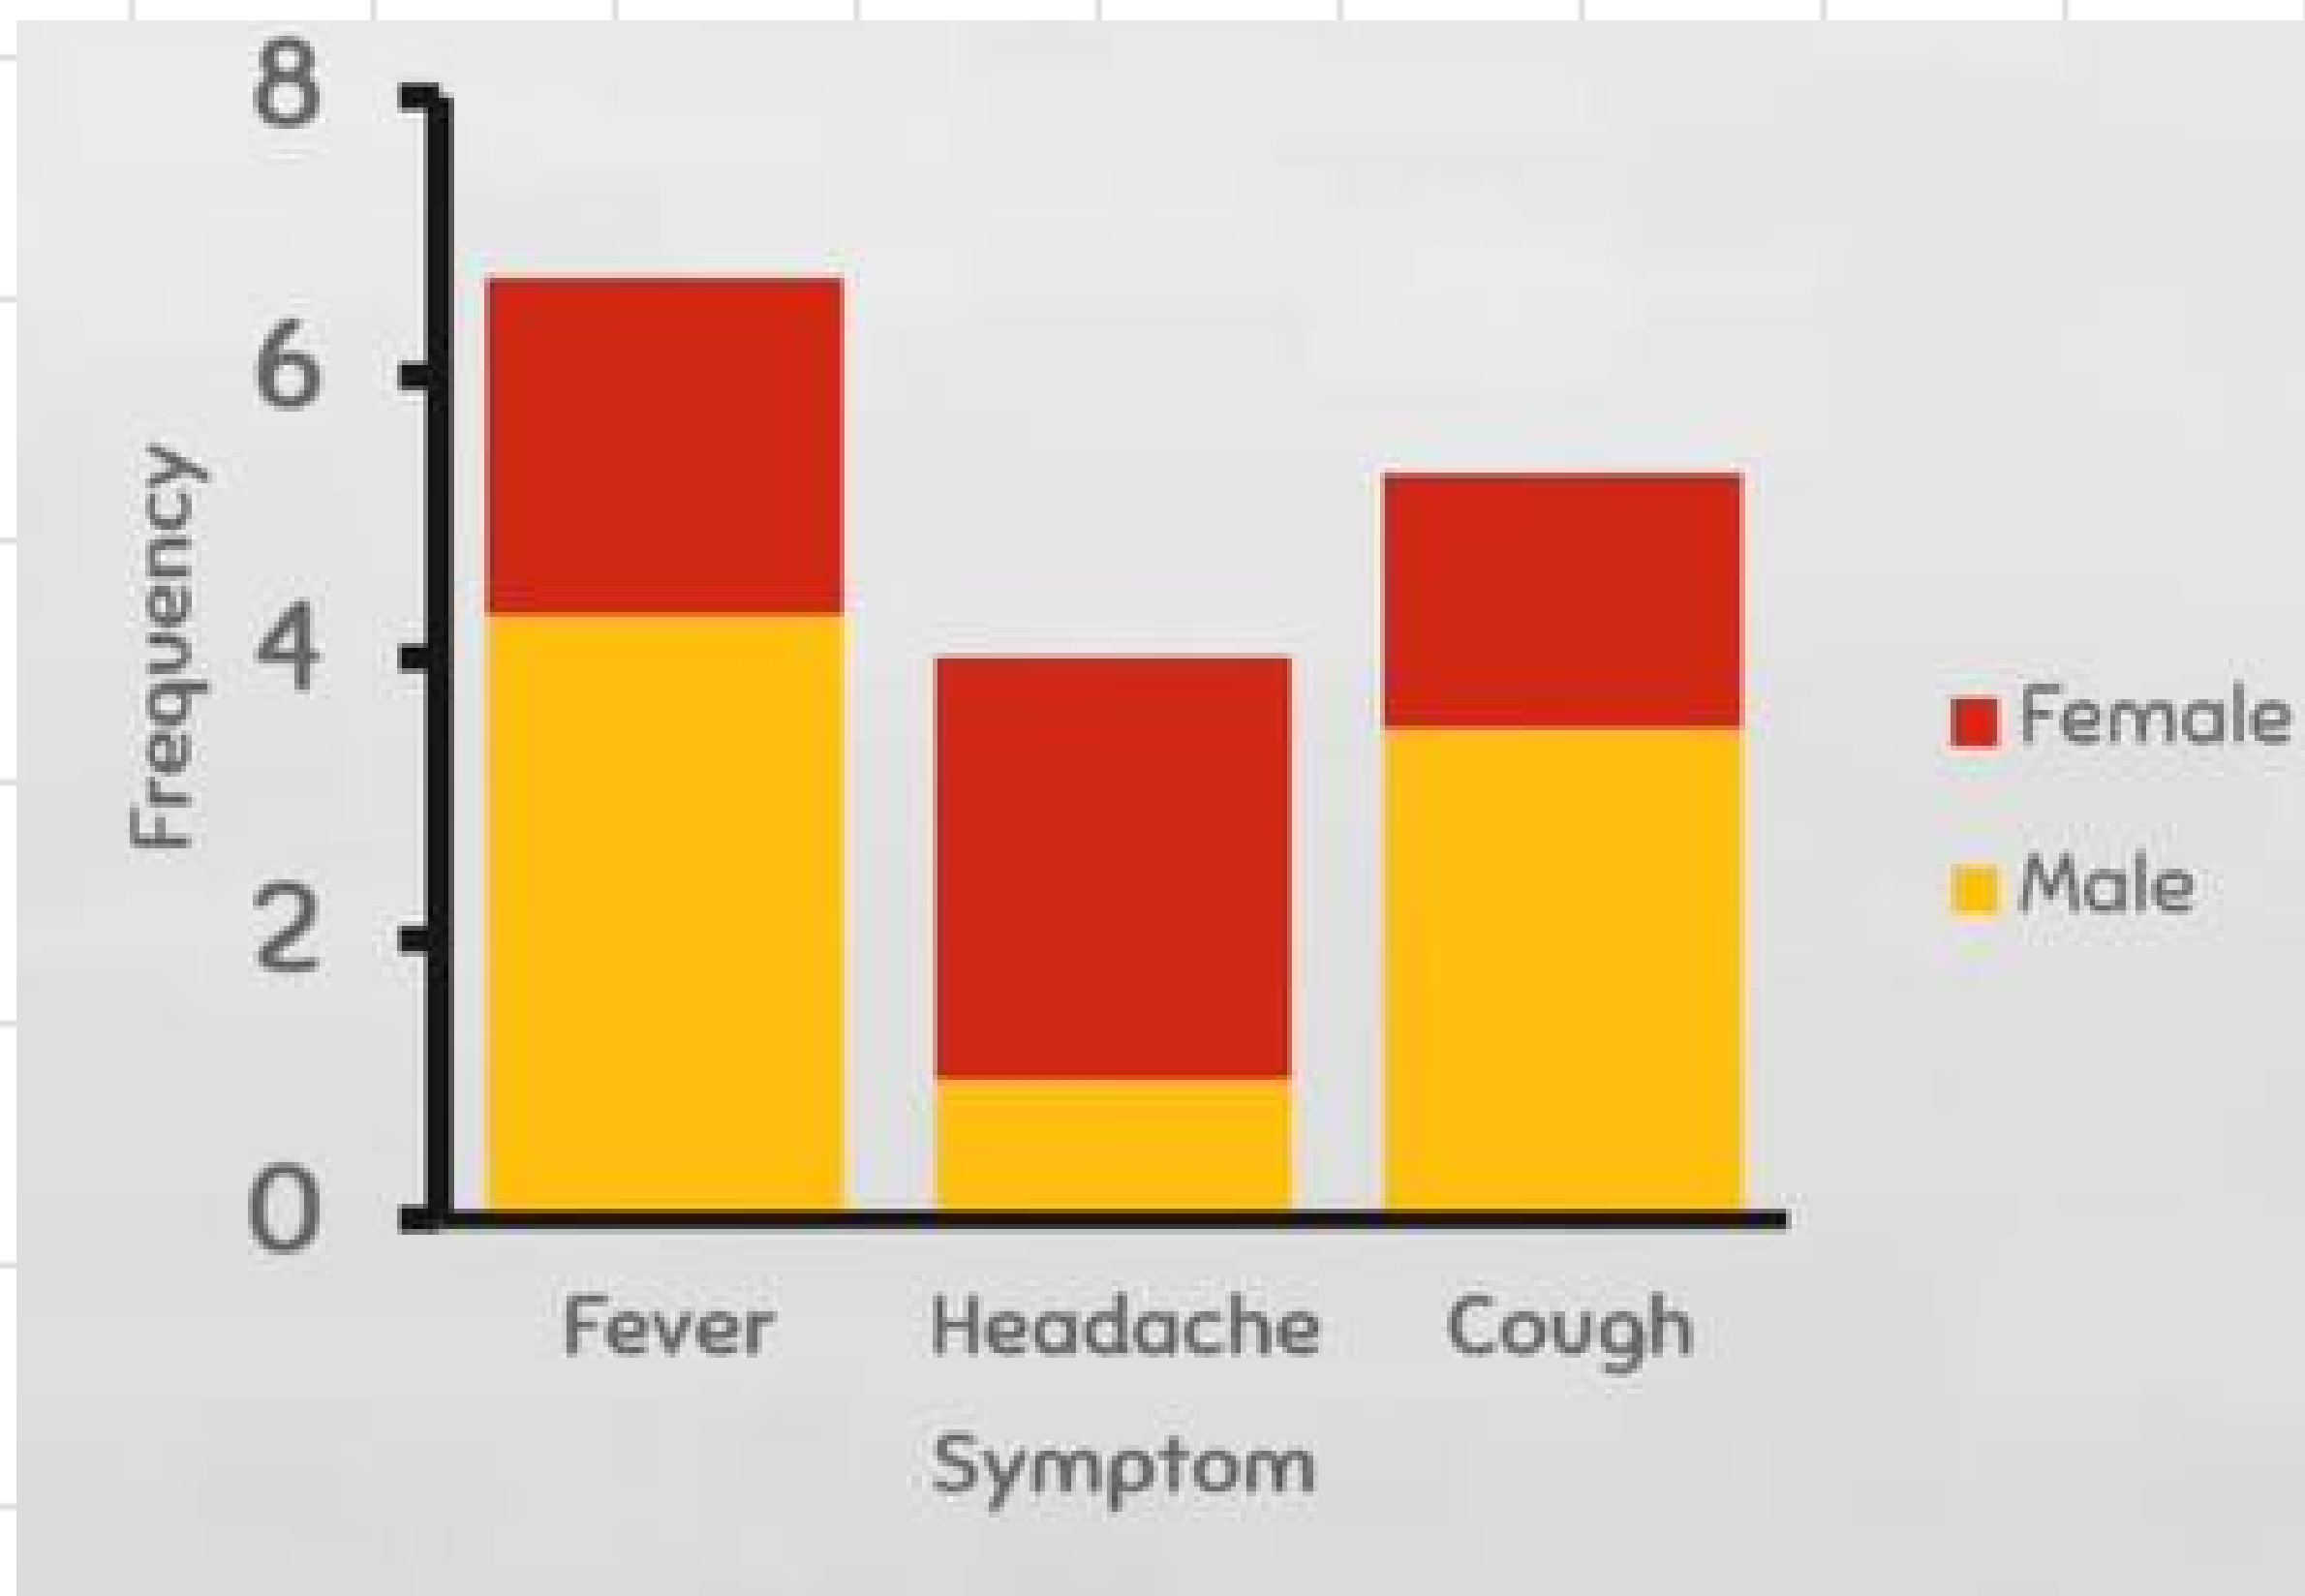

→ Multiple

comparing
data of two
categorical
variables

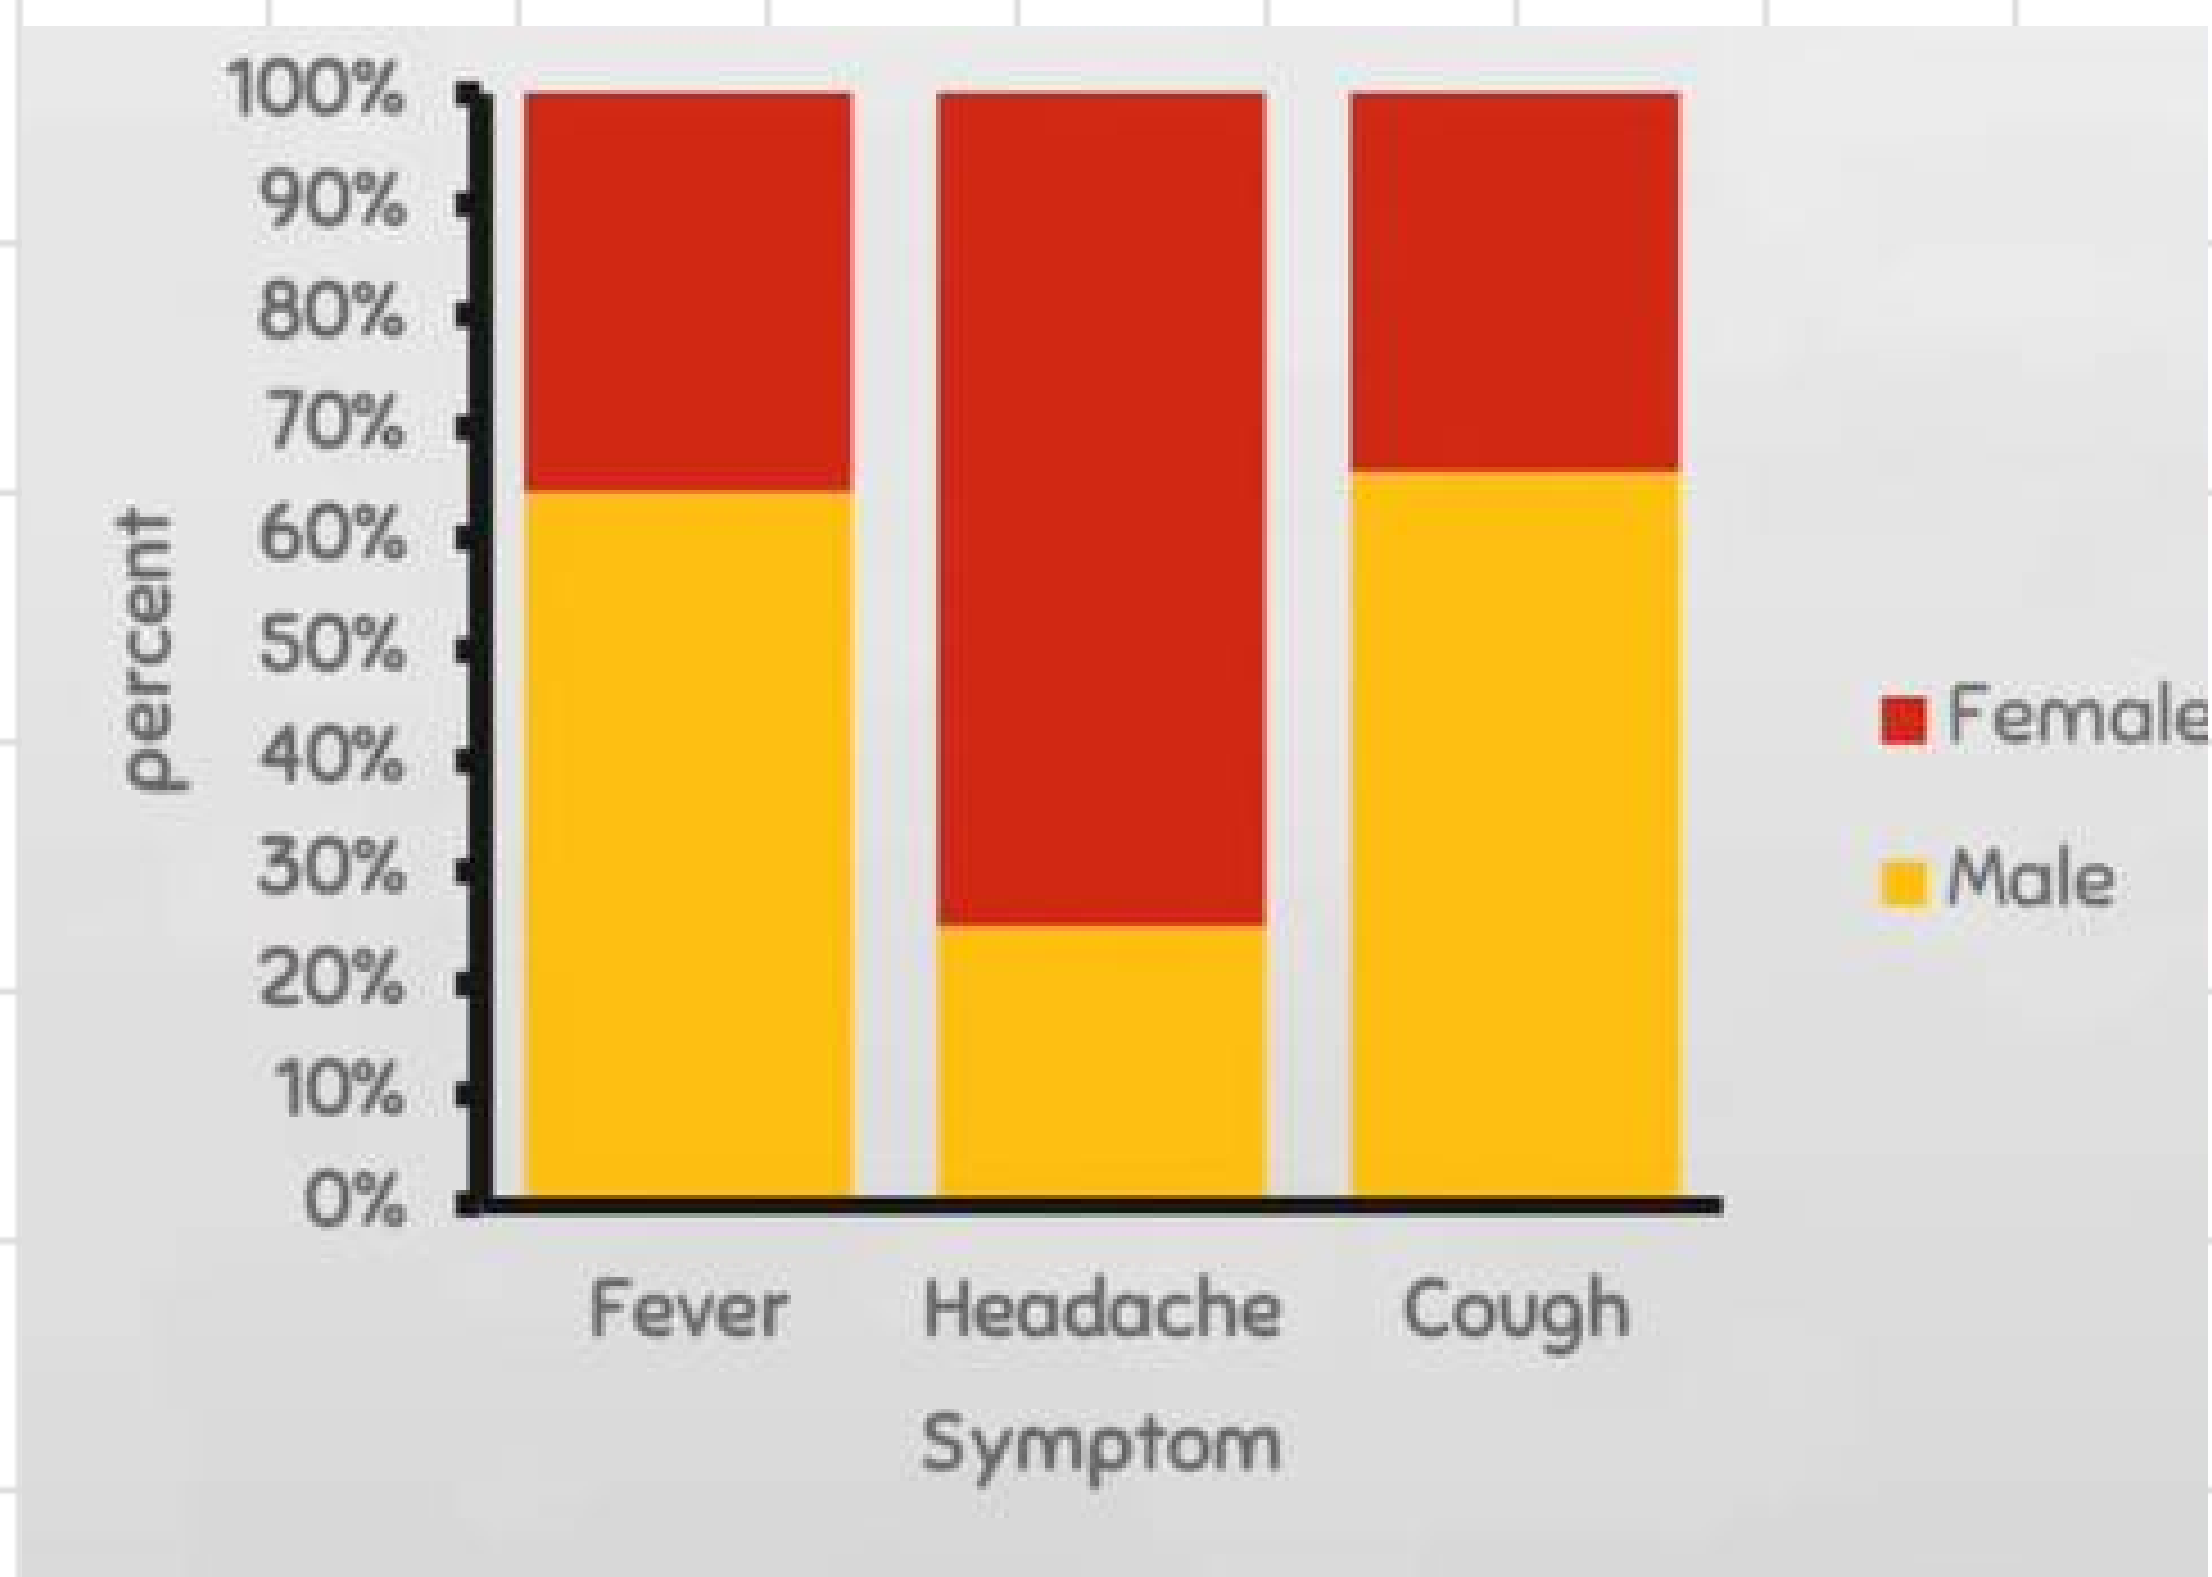

→ Component

1) Actual

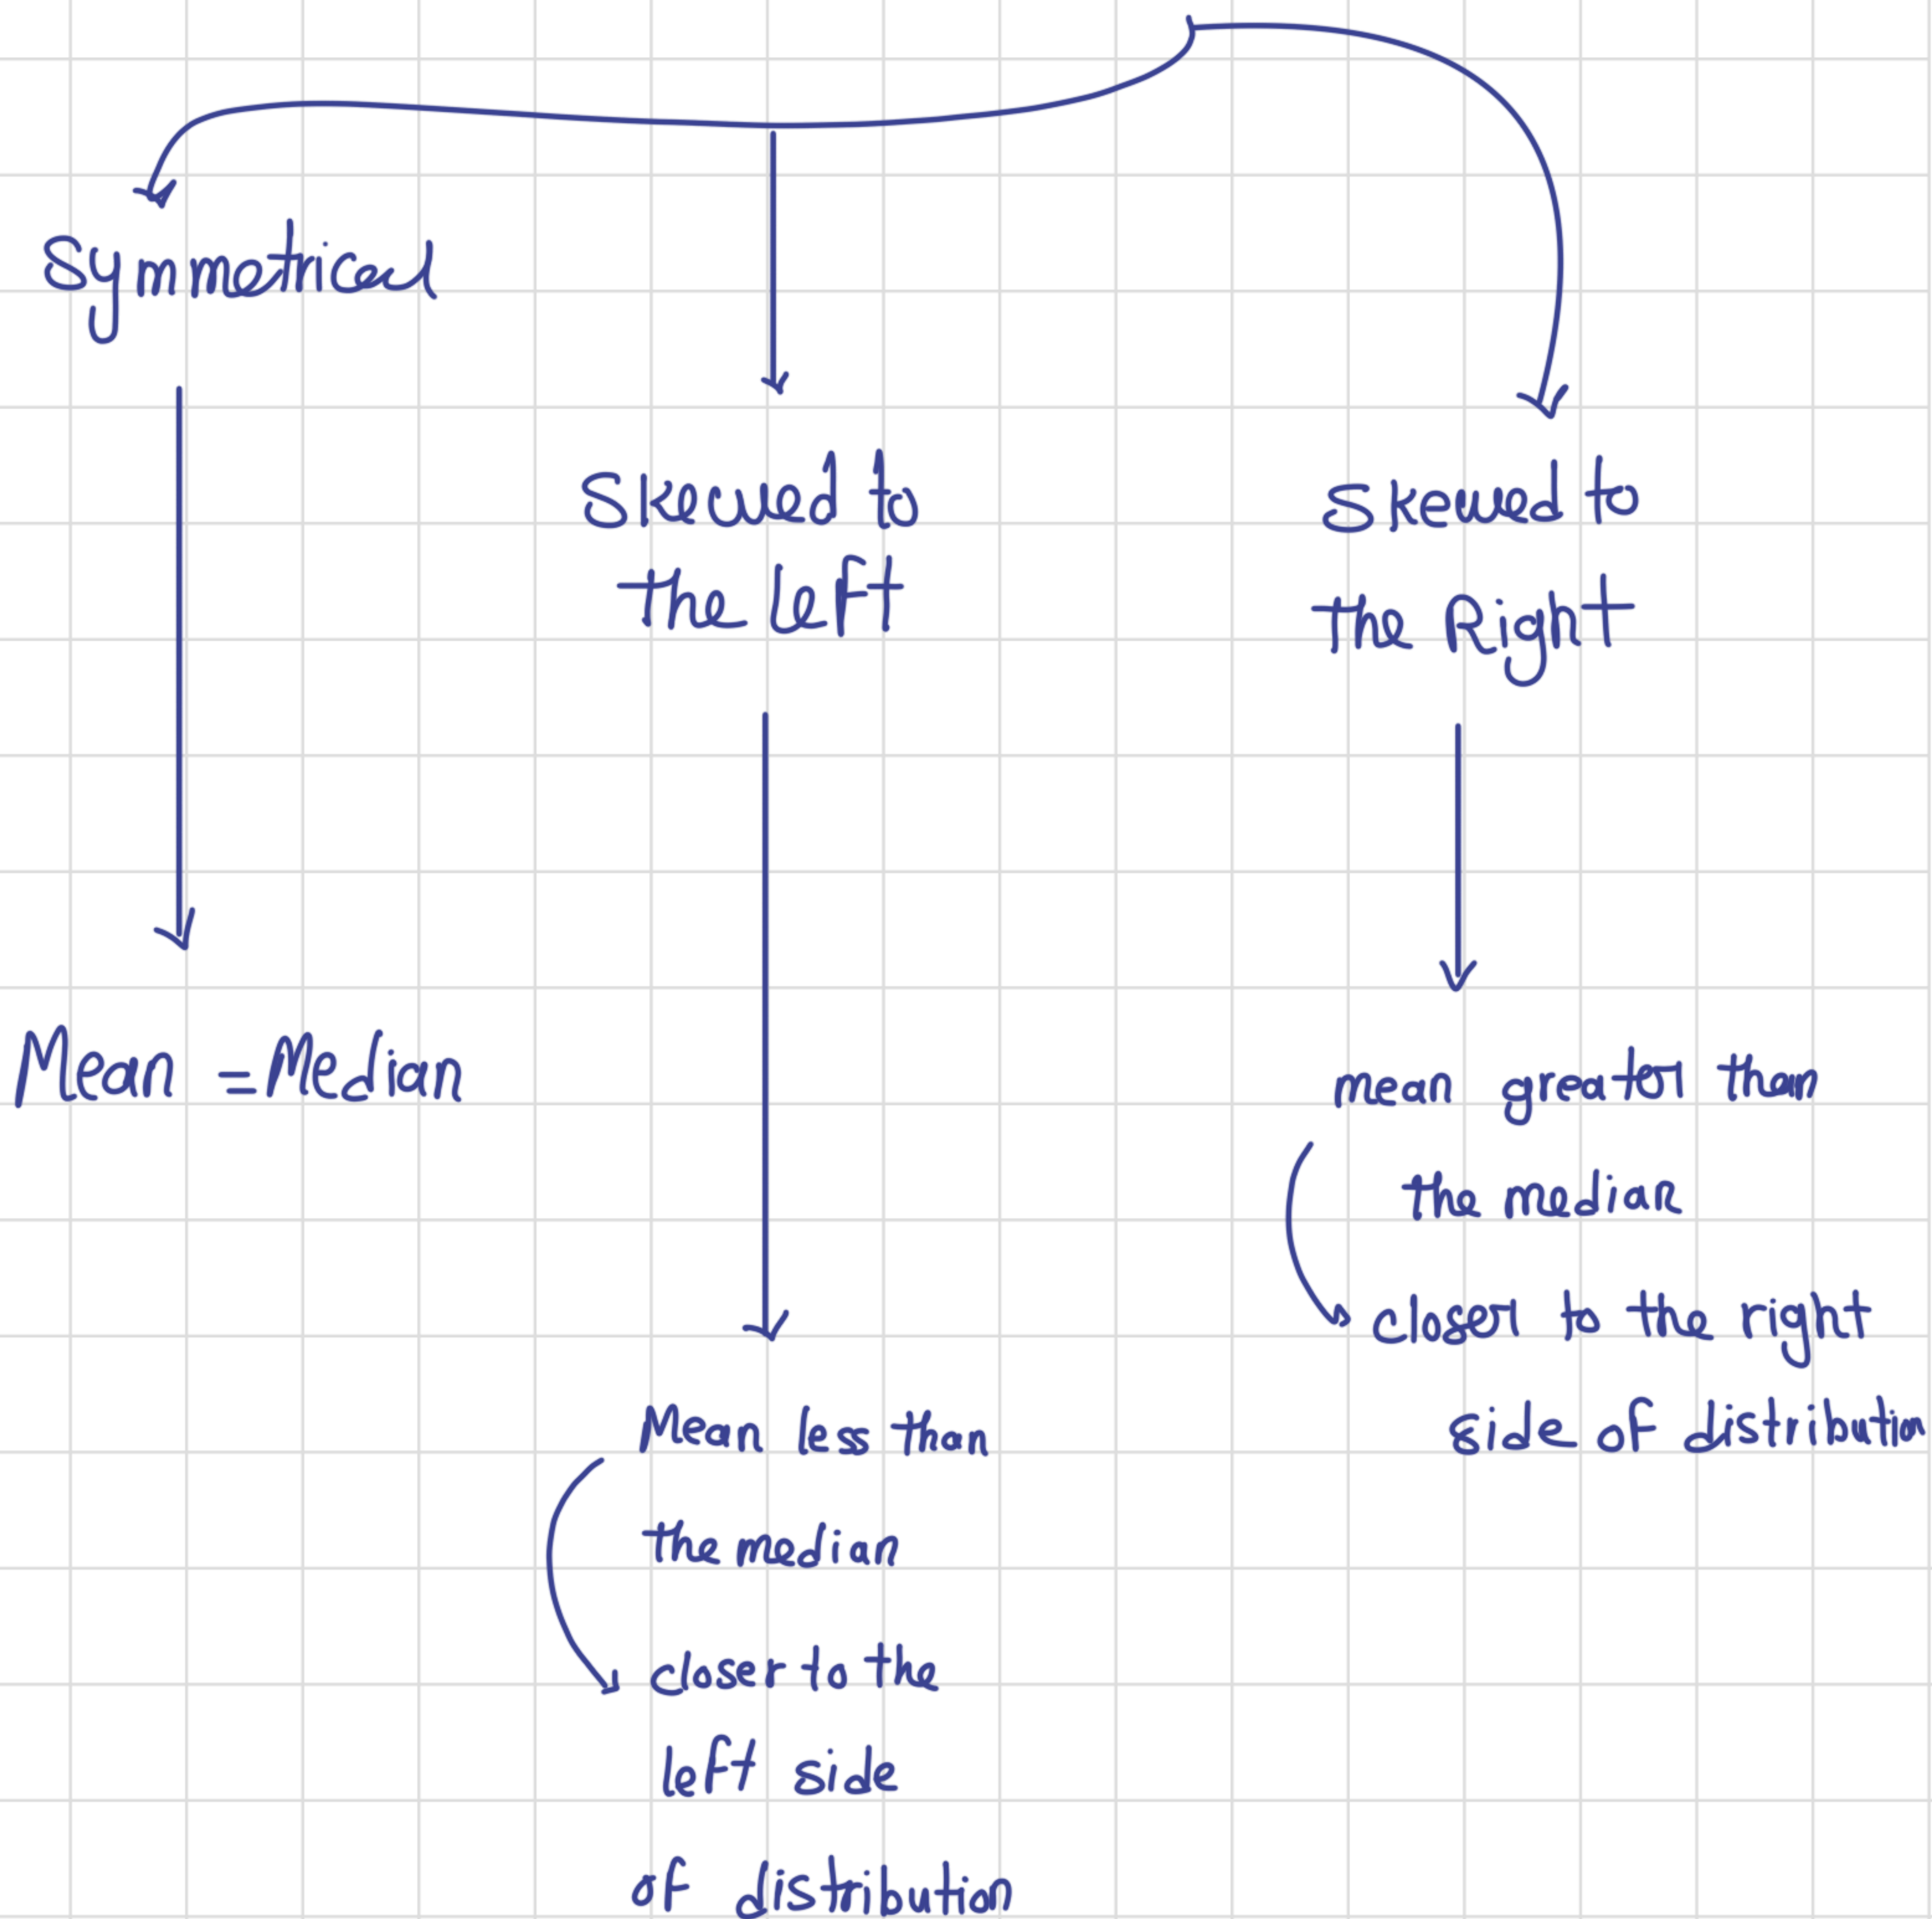

2) percent

Symmetry and Skewness

→ The shape of a distribution

Heatmap

graphical representation of data
where values are expressed as
colors

→ major advantages
in a spreadsheet

Violin plot

Combination of Box plot and kernel Density plot .

→ provides a visual representation of distribution and density of the data
